

The screenshot displays the 'sheel' software interface, which is designed for creating and editing musical notation. The top toolbar contains several icons and labels for different functions: 'riproduci' (play), 'cambia la griglia dei toni' (change the grid of tones), 'cambia ottava' (change octave), 'modifica la velocità' (change speed), 'ancora i fogli e i tratti' (anchor sheets and staves), 'cambia la griglia del tempo' (change the grid of time), and 'gestisci i livelli' (manage levels). The main workspace features a musical staff with a yellow box highlighting a section. This box contains a 'sheet-1' label and a close button. A sidebar on the right shows a list of sheets, with 'sheet-1' selected. The bottom of the interface has a keyboard layout with various function keys.
